

Scottish Country Dancing needs YOU!

Northland Basic Teaching Skills Course 2017

The BTS course intended for people who are briefing or teaching dances now or would like to in future and would like to learn techniques for teaching Scottish Country Dancing at a club level. While some may go on to become certificated teachers the idea of this course is to give people the basic skills needed to teach a dance or a night of dancing.

The course will look at the various elements that make up a club night such as warm up/ cool down routines, selecting dances for your programme, teaching formations and practicing steps and selecting music.

The course will also cover aspects of briefing at balls/socials.

During the course attendees will participate in discussions, receive instruction, practice the skills they are being taught and dance at various times across the two days.
